### NEW YORK MARKET QUIET

Mexican Situation Is a Disturbing Factor and the Balkan War a Menace.

By L. A. PLEMING.

There will be no chaine for some time, bowever, in the machinery of the diplomatic and military service below the Executive, and it is believed that the Taft policy will be followed by Wilson null provocation beyond endurance comes from the Mexicans. "Yellow press" agistation, demagognery in Congress, European pressure and the natural cussedness of Ill-disposed persons in Mexico are elements sufficient to keep the sovernment officials uneasy for some time to come.

he government officials unempty and the inner to come.

An irregular market in London relected the uncertainty as to the time of ending the Balkan war. Protongation of that struggle is beginning to have infurence again on the money markets of Europe and of the world.

Conditions are in a way similar to those existing in class when the holowing tip of the Marie caused this country to take the step which had long been held in abryance. Along the Texas-Megican border State troops and rangers are confronting revolutionists and Mexican regulars, with the United States troops and the lives of foreigners. Europe looks to the United States as the "big brother" to keep the younger bad boy from unabling glass. Where fighting men santher with gun on hip there is always a chance to "stat something."

The question is asked whether there is not method and premeditation in the critis in Mexico just on the eve of a complete change in the American government.

There will be no change for some Furnished by N. L Carpesier & Ca.
